

PURE 9ty

The PURE 9ty wall sconce is the latest innovation to come out of Mike Randall Design. It signals a shift towards a more sustainable solid state lighting design with the introduction of OLEDs to his lineup.

In its simplest form PURE 9ty comes in up, down or up/down light versions. All are available in standard, non-dimmable, retro fit format available here and a new build fully dimmable format that is compatible with a variety of automated home systems. Contact us for details on new builds

PURE 9ty has several other customizable features including wood finish and the addition of a shade option (Contact Mike for details on this).

As is typical of Mike's designs, sustainability principles are key. He only uses North American hardwoods (Eastern Maple, Ash, White Oak and Black Walnut) but all the finishes and glues meet Mike's strict "Home Friendly" criteria. In addition to this, all the electronic components are fully serviceable, extending the PURE 9ty's life well past that expected of the electronics. Details on product care, service options and warranties can be seen [here](#).

Dimensions:

Height: 7"

Width: 6"

Depth: 7"

Mounting:

The PURE 9ty comes with a unique mounting system specifically designed with the installer in mind. All hardware is matte black as standard with the mounting system fitting over over a standard 4" round J-Box.

LED Specs:

200 Lumen OLED from OLEDWorks (x2 for the up/down version)

Power:

EldoLED constant current power supply (details available on request)

Dimming System:

Dimmable versions use Lutron's POWPack system with their Pico remote and SmartHome compatibility.

Certification:

While the SiteLines is only certified for use in Canada all the components used are UL / ETL certified. All installations should be done by a qualified electrician.

Finish Options:

Ash

Black Walnut

Natural
White Oak

Ebonized
